

# Testing the Media Player

## Scan To QA and Submit Results

Scan this code using a tablet or smartphone and follow the steps to QA the Nightlife Media Player

<https://forms.office.com/r/8Fv83dAkXg>

## 1. Audio

The Media Player will play music automatically once powered on (please allow approximately five minutes for start-up to complete).

To confirm the Media Player's audio is working and connected correctly, ensure the volume on the audio distribution equipment is turned up and music is playing.

### QA CHECKS

- Is music playing through the audio distribution equipment?

## 2. Video

**NOTE:** This test is only applicable if screens have been connected as part of the Media Player installation.

The Media Player will play video along with audio upon start up.

To confirm the Media Player's video outputs have been connected correctly to screens and the audio is in sync complete the following:

Ensure the screen(s) connected to **Video + Audio Output 1** are turned on and displaying vision from the Media Player (i.e. music videos, ambient visuals, digital signage). When a music video is playing, listen to the audio and confirm the corresponding music video is playing and that it is in sync.

*If required as part of the installation, check the screen(s) connected to **Video Output 2** are turned on and displaying vision from the Media Player (i.e. ambient visuals, digital signage).*

### QA CHECKS

- Is Video + Audio Output 1 displaying vision from the Media Player on-screen?
- Is the Video and Audio in sync when music videos are playing on-screen?
- If required:** Is Video Output 2 displaying vision from the Media Player on-screen?

### 3. Network/Local Connectivity

The Media Player will have been connected to a local network as part of the installation (i.e., the business' IT infrastructure or a Nightlife-supplied router).

To confirm the Media Player's connectivity to the local network, use a supplied Nightlife Tablet or a smartphone with the Manage My Nightlife app and an account.

NOTE: If the tablet is not available or an account cannot be accessed, skip this step or call Nightlife.

Use the Manage My Nightlife app to pick a song. For assistance refer to **Manage My Nightlife Navigation** (Pg. 10).

#### QA CHECKS

Did the correct song play?

### 4. Internet Connectivity

Please wait until at least one song has played before testing the internet connection. If an internet connection is not available, skip this step.

The Media Player will have been connected to a network with internet access as part of the installation (i.e. the business' IT infrastructure or a Nightlife-supplied router).

To confirm the Media Player's connectivity to the internet, run the crowdDJ web app on a smartphone.

For easy access to the web app, a unique crowdDJ Scan to Test QR code is included on the front cover of the Installation & Testing guide provided with the system.

Scan the QR code with a mobile device, pick a song in the crowdDJ web app then wait for it to play.

#### QA CHECKS

Did the correct song play?

### 5. Nightlife-Supplied Devices

NOTE: For this test, it is assumed the Nightlife Tablet or the crowdDJ Kiosk are part of this installation and have been installed. If these are not part of the installation for this venue, skip this step.

This test ensures the Nightlife Tablet and crowdDJ Kiosk are working correctly and confirms their connectivity to the Media Player.

#### NIGHTLIFE TABLET

The Nightlife Tablet will automatically run the **Manage My Nightlife app** upon start-up.

To confirm the Nightlife Tablet is functioning correctly, queue a song and wait for it to play.

For assistance refer to **Manage My Nightlife Navigation** (Pg. 10).

#### QA CHECKS

Did the correct song play?

#### CROWDDJ KIOSK

The crowdDJ Kiosk will automatically run **crowdDJ** upon start-up. To confirm the crowdDJ Kiosk is functioning correctly, pick a song and wait for it to play.

#### QA CHECKS

Did the correct song play?
